Photo Organizer Software, v.4.91 Released

Sunday, 08 April 2007

Was released Photo Organizer Software, v.4.91.

Photo organizer software installation now become easier as never. Just download photo organizer software, run photo organizer installation pack and all your photos will be organized. Automatic photo organizer software not just can organize photos, this user-friendly photo organizer will organize photos exactly as you want.

Main advantage of new version is that users for installing it do not need install any additional components - now it is not needed. All needed components are already included in photo organizer software installation pack and will be installed automatically. User just need to run installation pack - all installation actions will be executed automatically, on any computer with any Windows operating system - from early Windows 95 to modern Windows 2003, XP, Vista and Windows 7.

Changes related to previous versions:

- Installation process was strongly simplified: all needed system components now are installed automatically.

- Extended photo file organizing templates.

- Improved media files playback process.

- To log context menu appended navigational options: to first, previous, next and last page.

- Appended possibility to customize main window background color.

- Registration process made easier - it is not needed to restart application now to apply registration information.

- Changed application visual appearence (it made more ergonomic and user-friendly).

- Appended possibility to directly select, what photo organizer software should do with processed files: copy them to database folder, or move.

- All photo organi9zer software settings was moved from main application window to the separate settings window.

Latest version of Photo Organizer Software may be purchased in our online store. All registered photo organizer software users can get it for free.
